

**IN THE DRAWINGS:**

Figure 3 has been amended as shown on the replacement sheet attached hereto.

## **REMARKS**

In the Office Action dated April 29, 2005, a correction in Figure 3 was required, which has been made as shown on the replacement sheet attached hereto.

The Examiner also noted a number of locations in the specification requiring revision. All of the Examiner's suggestions, or comparable changes in view of changes in the language of the specification made by the Applicants, have been adopted. Additionally, the specification has been revised to consistently refer to the element 10 as a "handle." This is consistent with the language in the claims as originally filed and the usage in the specification as originally filed in the seventh line from the bottom of page 3. Therefore, no new matter is added thereby.

A number of changes in the claims also were suggested, all of which have been adopted.

Claims 1, 2 and 3 were rejected based on the prior art, but claim 4 was stated to be allowable if rewritten in independent form. The subject matter of claim 4 has therefore been embodied in independent claim 1, however, claim 4 originally depended through claim 3. Claim 3 states that the handle is C-shaped, however, the particular shape of the handle does not appear to be necessary to distinguish the subject matter of claim 4 over the teachings of the prior art of record. Claim 3, therefore, has been retained in dependent form, and only the subject matter of original claim 4 itself has been embodied in independent claim 1.

All claims of the application are therefore submitted to be in condition for allowance, and early reconsideration of the application is respectfully requested.

Submitted by,

*Steven H. Noll*
